

CHILE 1973 - PALESTINE TODAY

1. Democratic elections produce results that Washington and London disapprove of
2. A military regime uses massive violence to crush a people's aspirations
3. The US and UK governments arm and support the military regime to smear and demonize its opponents
4. Scots are a proud part of world-wide solidarity action in support of a struggle for freedom

The East Kilbride Rolls Royce workers made a great contribution to resistance to the military junta in Chile.

The best way to honour their spirit of International solidarity and resistance today is to support the Palestinian people's call for BDS – Boycott, Divestment and Sanctions against the state of Israel until it ends its crimes against the Palestinian people.

Lothian and Tayside Pension Funds invests in an Israeli bank that facilitates war crimes against the Palestinian people. Falkirk Pension Fund has already divested from Israeli Bank Hapoalim. Help us to pressure Lothian and Tayside Pension Funds to follow suit.

DEFEND FREE SPEECH

If Israel is not a racist endeavour then the Palestinians cannot be the victims of a racist programme of ethnic cleansing. This is the true goal of those promoting the IHRA definition, the Israeli Embassy and their various friends of Israel groups, most of whom defend - like Blair and Brown - the actions of Israeli snipers who are massacring Palestinian demonstrators.

The racist reality of Israel today is Palestinian house demolitions, burning of Palestinian farms, trees and families, mass incarceration and torture of Palestinians, repeated massacres of Palestinians, humiliating checkpoints for Palestinians that Jews sail through. In the State of Israel Jews are legally, politically, economically privileged over Palestinians from birth.

Israel is a social system that US White supremacist leaders envy and wish to emulate. Smearing supporters of Palestinian freedom as racists, many of us lifelong anti-racist campaigners, masks the burgeoning alliances between pro-Israel lobbies and extreme right antisemitic forces.

We must defy this attack on free speech. SPSC will show in everything we say and write that Israel is a racist state. The fight for Palestinian freedom from a bestial regime is now joined to our own fight for free expression at home. Join us.

Scottish Football Association: support Palestinian rights

Scotland is playing Israel on 11 October and 20 November. We ask that the Scottish Football

Association support the Palestinian call to suspend the Israeli Football Association from FIFA until Israel respects the human rights of Palestinians and observes international law.

The Palestinian call highlights the IFA's "deep complicity in Israel's violations of international law and Palestinian human rights" because it includes six Israeli football teams based in illegal Israeli settlements. These settlements are considered a war crime under international law.

Scotland should not play Israel until it complies with international law.

Show your support for Palestinian rights and call on the SFA to stand up against apartheid and for equality and justice.

Please sign and share our petition to the SFA:
